

HYPNOS®

THE MOST COMFORTABLE BEDS IN THE WORLD

Nature's Reign

6711 Cypress Firm

Outer Tufting

The mattress is fully outer tufted by hand, securing the upholstery layers to ensure that they will not settle or shift over time.

New Zealand Natural Wool

100% natural New Zealand provides temperature and moisture management properties as well as provides mini spring capabilities through its elasticity, staple and crimp capabilities.

Natural Silk Wool and Cashmere

Cashmere has a unique softness and adds a luxurious feel to a mattress. The fibre is naturally stretchy which ensures you can benefit from the exquisitely soft filling. The high moisture content allows its insulation properties to change with the relative humidity in the air helping keep you warm in the winter and cool in the summer.

Natural Cotton Comfort

Surrounding the comfort and support layers, the natural cotton batting is breathable, helping to regulate body temperature and heart rate. It also provides a soft support, excellent moisture absorption and wicking properties.

Corn Fiber Support Pad

Densified corn fiber support pad provides optimal mattress support while maintaining the use of natural sustainable materials, eliminating the need for polyurethane foam.

EXCLUSIVE! Advanced Steel Encased Joey Coil Design

The exterior coil provides an initial comforting feeling, responding to weight and body movement. The interior coil, once engaged with body weight, reacts with increasing firmness, providing the essential support characteristics needed for correct postural alignment.

HYPNOS®

THE MOST COMFORTABLE BEDS IN THE WORLD

Nature's Reign

6768 Laurel Euro Top

Hand Side Stitching

Side stitching is a process by which the outer row of pocket springs is hand stitched to the side panels of the mattress. This prevents the edge of the bed from sagging, creating true edge-to-edge support and more sleeping surface.

Compression Hand Tufting

Hand tufting is a true mark of quality. Durable fasteners are inserted by hand through all layers to secure the upholstery. This time-intensive technique dramatically reduces body impressions and provides superb support.

New Zealand Wool and Cashmere Blend

New Zealand sheep wool naturally regulates temperature and wicks away moisture. Cashmere wool, obtained from the cashmere goat, is finer, stronger, softer, and approximately three times more insulating than sheep wool. We add the perfect blend of these two natural fibers to the quilt to keep you comfortable, cool and dry.

Copper Infused Talalay Latex

Natural Talalay Latex is the ultimate pressure relieving material. Copper is naturally antimicrobial and is known for its heat transferring properties. Infusing natural latex with copper helps ensure a healthier, cooler night's sleep.

Graphite Infused Talalay Latex

Talay Global Graphite Infused Talalay is the only graphite infused Talalay latex in the world. It provides the same benefits of classic Talalay with the added benefits of graphite like a luxurious plush feel with enhanced strength and durability.

Certified Organic Cotton

Surrounding the comfort and support layers, is breathable, certified organic cotton. Natural cotton fiber is lightweight, hypoallergenic, recyclable, and biodegradable. Used in textiles for more than 6,000 years, it keeps your sleeping environment cool and comfortable.

100% Natural Merino and Joma Wool Blend

Merino wool traps air in the sleeping surface, enabling micro-climate control that cannot be artificially manufactured in polyester fibers. Joma Wool® is derived from a process that removes traces of natural lanolin and crimps the fiber to increase bulk, springiness, comfort, and longevity. The resulting regulation of body temperature and humidity ensures a more comfortable night's sleep.

Natural Cotton & Wool Fiber Pads

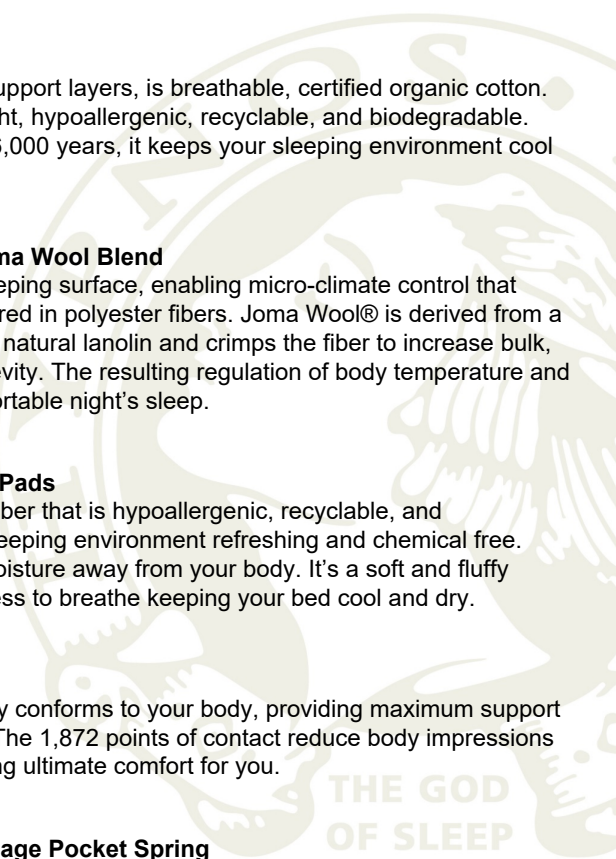

Natural cotton is a lightweight fiber that is hypoallergenic, recyclable, and biodegradable. It keeps your sleeping environment refreshing and chemical free. Wool helps to wick heat and moisture away from your body. It's a soft and fluffy material that allows your mattress to breathe keeping your bed cool and dry.

1872 Pocket Micro Coil

The European mini coil instantly conforms to your body, providing maximum support to the areas you need it most. The 1,872 points of contact reduce body impressions in the mattress while maintaining ultimate comfort for you.

1070 Steel-Encased 13.75-Gauge Pocket Spring

The 1,070 steel-encased 13.75-gauge pocket spring unit provides firmer, deep-down support and ideal comfort throughout the entire mattress.

HYPNOS

THE MOST COMFORTABLE BEDS IN THE WORLD

Nature's Reign

6736 Camellia Pillow Top

Camel Hair

This very fine fiber, collected from the soft underbelly of the animal in the summer months, naturally manages daily temperature changes in its natural environment via its superb insulation properties. It is soft and luxurious, and therefore creates the perfect top surface to a mattress.

New Zealand Natural JOMA & Alpaca Wool

Alpaca is one of the best of the new breed of exotic, high performance fibers. It is similar to wool except that it naturally contains no lanolin which improves performance in very humid conditions and it is naturally hypo-allergenic, removing the need for chemicals to create this important benefit.

Natural Latex

Resilient natural latex create a plush feel, conforming instantly to embrace your body's unique shape. It distributes weight evenly, reducing the pressure points that cause tossing and turning.

Microcoil Comfort Layer

The European mini coil design instantly conforms to your body, providing ultimate comfort to the areas you need it most. The 2000 points of contact reduce body impressions while maintaining maximum support.

New Zealand JOMA Wool

JOMA Wool is derived from a process that thoroughly cleans the fibers to remove traces of lanolin, which naturally occur in wool and at the same time sets a permanent crimp in the fiber via heat setting. This then increases bulk, springiness, comfort and longevity in the fibers.

EXCLUSIVE! Advanced Steel Encased Joey Coil Design

The exterior coil provides an initial comforting feeling, responding to weight and body movement. The interior coil, once engaged with body weight, reacts with increasing firmness, providing the essential support characteristics needed for correct postural alignment.
