Where Sleep is Paramount™

paramount

COLLECTION

Classic East Coast luxury intersects next-generation innovation in the new Paramount line. The collection features innovative state of the art materials like natural Talalay latex, copper comfort quilting foam, gel infused memory foam and German engineered pocket springs.

This luxury line also contains layers of New Zealand wool-cashmere, certified organic cotton, and all natural Talalay latex—all surrounded in elegant knit and damask fabrics pulled from 1930s art deco designs inspired by Paramount Sleep Company's founding date in 1935.

TEMPERATURE REGULATION

New Zealand Wool & Cashmere Blend

New Zealand sheep wool naturally regulates temperature and wicks away moisture. Cashmere wool, obtained from the cashmere goat, is finer, stronger, softer, and approximately three times more insulating than sheep wool. We add the perfect blend of these two natural fibers to the quilt to keep you comfortable, cool and dry.

Natural Cotton

High-quality, natural cotton fiber is lightweight, hypoallergenic, recyclable, and biodegradable. Used in textiles for more than 6,000 years, it keeps your sleeping environment cool and comfortable.

PRESSURE RELIEF

Natural Latex

Natural latex breathes up to seven times better and provides up to 33% more pressure relief than other latex foams. Oeko-Tex certified, hypoallergenic and resistant to dust-mites, mold and mildew, latex gently lifts your body, conforms to your unique shape and distributes weight evenly.

Copper Comfort Foam

Our innovative comfort foam infused with copper naturally fights germs, allergens and common bacteria build-up. Copper's heat transferring properties also help keep you cool, dry and comfortable.

DURABILITY

Compression Hand Tufting

Hand tufting is a true mark of quality. Durable fasteners are inserted by hand through all layers to secure the upholstery. This time-intensive technique dramatically reduces body impressions and provides superb support.

SUPPORT

896 Firm & Plush Pocket Coils

Paramount Collection mattresses boast 896 pocketed coils. Firm and Luxury Firm models use a 13.75-gauge unit for firmer, deep-down support, while the Plush and Pillow Top models use a 15-gauge unit for more conforming support. No matter your preference, you'll experience ideal comfort throughout the entire mattress.

Fenwick

The Fenwick series feature luxurious knit fabric inspired by 1930's art deco design. The mattress is fully hand tufted to secure upholstery layers as well as to reduce body impression over time. It features an 896 foam encased pocket spring core with copper foam layers that naturally assist in fighting germ, allergens and common bacteria build up. The gel foam layers increase support for the body and maintains a high level of comfort and a cool sleeping temperature.

St. Augustine

The plush stretch knit fabric of the St. Augustine series feature 100% natural New Zealand wool-cashmere blend which is extra springy due to its unique crimping process, ensuring a gentle sleeping surface that maintains its loft over time. The mattress is foam encased with an 896 pocket spring core. Graphite and copper infused natural Talalay latex assists in fighting germ, allergens and common bacteria build up making for a healthy night's sleep.

Amelia

The Amelia series is designed with old world elegant damask and is hand tufted with soft wool rosettes. The 100% natural New Zealand wool-cashmere layer ensures a gentle sleep surface that maintains its loft over time, and wicks moisture away leaving sleepers comfortable, cool and dry. The luxurious euro top includes copper and graphite infused Talalay latex foam that naturally fights germs, allergens and common bacteria build up.
