## Luxury Stretch Knit Fabric

The elasticity of stretch knit fabric facilitates contour while reducing surface tension. The flexibility of the fabric creates a surface that seamlessly and quietly adapts to the weight and shape of the body.

## High Density Foams

High-quality, dense comfort and support foam conforms to your body, which reduces pressure in the knees, shoulders, and hips while you sleep.

## 5-Zone High Density Performance Foam

This zoned, high-density foam reduces pressure points in the shoulder and hip areas while increasing support in the lumbar region and behind the knees.

## Upholstery-Grade Foam Encasement

Permanently seals the innerspring 360 degrees around to deliver a durable, comfortable seating edge and 20% more sleeping area.

## 800 Nested Pocket Spring

The pocket springs are nested together to provide a level sleeping surface and to ensure springs don't separate. Each spring moves independently and contours to the shape of your body.
