KEY FEATURES #7420

The Seal of Cotton is a trademark of Cotton Incorporated.

- 1. Designer Luxury Cooling Knit Fabric** Made of phase change material that provides an initial cooling sensation to help you fall asleep faster and ensures a comfortable night's sleep from start to finish.
- 2. Compression Hand Tufting** Creates loft that supports the body to virtually reduce body impressions. Hand tufting is a true mark of quality. Durable fasteners are inserted by hand through all layers to secure the upholstery. This time-intensive technique dramatically reduces body impressions and provides superb support.
- 3. Natural FR Rayon Fiber** The fire-retardant fiber we use is the most natural design made from a Rayon and Silicate combination.
- 4. Silk, Wool, & Cashmere** Naturally regulates temperature and wicks away moisture. The perfect blend is added to the quilt to keep you comfortable, cool and dry.
- 5. High-Density Support Foam** High-quality, dense support foams conform to your body, which diminishes uncomfortable pressure points while you sleep.
- 6. Natural Latex Lumbar Support** Provides extra support where you need it most, in the center third of your body, virtually eliminating sagging in the center of the mattress.
- 7. High-Density Recycled Insulator Pad** The high density recycled insulator pad in the upholstery layers provides deep down support and pressure relief.
- 8. High-Density Comfort Topper Block** An extra layer of support that provides better edge support and deep-down comfort.
- 9. Recycled "Blue" Cotton** Content that has been recycled after manufacturing but before consumption is known as post-industrial content, like pre-consumer content. By utilizing recycled materials, such as breathable cotton, we can minimize our carbon footprint and promote a healthier planet, ultimately leading to more restful sleep for both you and the earth.
- 10. 12.75-Gauge Heavy Duty Spring Design** The 12.75-gauge high density coil construction is made of tempered steel and is the heaviest and strongest support system in mattress construction today. Designed for high performance, it ensures support across the surface for proper spinal alignment.
- 11. Upholstery-Grade Foam Encasement** Permanently seals the innerspring 360 degrees around to deliver a durable, more comfortable seating edge with 20% more sleeping area.
- 12. High-Density Base Foam** Provides optimal base support for all the Heavy Duty Springs.
