A.H. Beard Classic Collection Key Features: #7620

1. Designer Stretch Knit Fabric

Allows airflow which facilitates the wicking of heat & moisture away from the surface. The fabric flexibility creates a surface that seamlessly adapts to the weight and shape of the body.

2. Compression Hand Tufting

Creates loft that supports the body to virtually reduce body impressions. Hand tufting is a true mark of quality. Durable fasteners are inserted by hand through all layers to secure the upholstery. This time-intensive technique dramatically reduces body impressions and provides superb support.

3. Silk, Wool & Cashmere Blend

Naturally regulates temperature and wicks away moisture. The perfect blend is added to the quilt to keep you comfortable, cool and dry.

4. High-Density Support Foam

Naturally regulates temperature and wicks away moisture. The perfect blend is added to the quilt to keep you comfortable, cool and dry.

5. Latex Lumbar Support

Provides extra support where you need it most, in the center third of your body, virtually eliminating sagging in the center of the mattress.

6. High-Density Recycled Insulator Pad

The high density recycled insulator pad in the upholstery layers provides deep down support and pressure relief.

7. High-Density Plush Memory Foam

Quick recovery memory foam provides the greatest level of motion separation and pressure relief.

8. Recycled "Blue" Cotton

Content that has been recycled after the manufacturing process but before being consumed is known as post-industrial content, like pre-consumer content. By utilizing recycled materials, such as breathable cotton, we can minimize our carbon footprint and promote a healthier planet, ultimately leading to a more restful sleep for both you and the earth.

9. 800 Nested Pocket Spring

The pocket springs are nested together to provide a level sleeping surface and to ensure springs don't separate. Each spring moves independently and contours to the shape of your body.

10. Upholstery-Grade Foam Encasement

Permanently seals the innerspring 360 degrees around to deliver a durable, more comfortable seating edge with 20% more sleeping area.

11. High-Density Base Foam

Provides optimal support for all the pocket springs.
