

Built to Perform. Proven to Last.

Paramount Sleep Company® collections, including HD Super Duty® and Nature's Spa® undergo rigorous independent testing to validate long-term comfort, structural integrity, and durability.

Our mattresses are subject to a 200,00 cycle rollator durability test simulating 20 years of real-world use at 360lbs, representing the combined weight of two sleepers.

****The industry standard for rollator durability testing is 100,000 cycles at 230lbs.**

Performance Results

Comfort Retention

Starting ILD: 717.83

ILD after simulated use: 665.16

Total softening -7.34%

Industry acceptable range: up to -25%

Structural Integrity

Original height: 10.79"

Height after simulated use: 10.47"

Total height change: -0.32"

Industry acceptable range: up to -1.5"

**Tested at higher weight. Tested for longer duration.
Proven to perform beyond expectations.**
