

OUR KEY PILLARS FOR A HEALTHIER, MORE SUPPORTIVE NIGHT'S SLEEP

COOL + COMFORTABLE

▶ PCM Cooling Cover

Made of phase change material (PCM) that provides an initial cooling sensation to help you fall asleep faster and ensures a comfortable night's sleep from start to finish.

▶ Silk, Wool & Cashmere Blend

Naturally regulates temperature and wicks away moisture. The perfect blend is added to the quilt to keep you comfortable, cool and dry.

SAFE + SUSTAINABLE

▶ We use coil units made from recycled railroad steel and fiber pads made from 60% recycled plastic bottles.

▶ All of our foams are CertiPUR-US® certified to ensure they have very low VOC emissions and are free from ozone depleters, chemical flame retardants, mercury and other heavy metals, formaldehyde, and phthalates.

SUPPORTIVE

▶ **Quilted Gel Lumbar** Provides extra support to the quilt layer and allows for a cooler night's sleep.

▶ **High Density Support Foams** Creates a durable sleeping surface and provides deep down support and pressure relief.

DURABLE

▶ Spring Designs

The 702 pocket spring unit is made from tempered recycled railroad steel and is encased in foam to provide optimal support while minimizing motion transfer. The high-density coil construction of the 12.75-gauge heavy duty spring unit is

the heaviest available and ensures support across the surface for proper spinal alignment.

▶ Upholstery Grade Foam Encasement

Creates a durable sleeping surface and provides deep down support and pressure relief.

OUR PERFORMANCE SLEEP SYSTEM

Active families need and deserve proper rest. The Back Performance collection delivers a balanced combination of comfort and support for optimum sleep so you can focus on the important things in life.
