

Georgia 2-Sided *Extra Firm*

Classic Collection

HD offers unmatched value and is designed for those who appreciate traditional quality. No corners are cut, no concessions are made, and only the finest materials are sourced.

#7420

Georgia

2-Sided Extra Firm

KEY FEATURES #7373

The Seal of Cotton is a trademark of Cotton Incorporated.

- 1. Designer Luxury Cooling Knit Fabric** A high-end, stylish knit material crafted for mattresses that combines a soft, upscale feel with cooling technology to promote airflow and maintain a comfortable sleep temperature.
- 2. Compression Hand Tufting** Creates loft that supports the body to virtually reduce body impressions. Hand tufting is a true mark of quality. Durable fasteners are inserted by hand through all layers to secure the upholstery. This time-intensive technique dramatically reduces body impressions and provides superb support and craftsmanship.
- 3. Natural FR Rayon Fiber** The fire-retardant fiber we use is the most natural design made from a Rayon and Silicate combination.
- 4. Silk, Wool, & Cashmere** Naturally regulates temperature and wicks away moisture. The perfect blend is added to the quilt to keep you comfortable, cool and dry.
- 5. High-Density Support Foam** High-quality, dense support foams conform to your body, which diminishes uncomfortable pressure points while you sleep.
- 6. High-Density Copper-Infused Memory Foam** Copper-infused memory foam is designed to stay cool, clean, and more supportive by combining the pressure-relieving comfort of memory foam, promoting a fresher, more restorative sleep experience.
- 7. High-Density Comfort Foam** Creates a durable sleeping surface and provides deep down support and pressure relief.
- 8. Recycled "Blue" Cotton** Derived from the denim manufacturing process, recycled "blue" cotton gives new life to premium natural fibers. The result is breathable comfort that supports healthy and restful sleep and a sustainable future. Cotton Incorporated brought this recycling program to prominence to bring awareness to the sustainability of cotton and a circular economy in fashion.
- 9. 12.75-Gauge Heavy Duty Spring Design** The 12.75-gauge high density coil construction is made of tempered steel and is the heaviest and strongest support system in mattress construction today. Designed for high performance, it ensures support across the surface for proper spinal alignment.
- 10. Upholstery-Grade Foam Encasement** Permanently seals the innerspring 360 degrees around to deliver a durable, more comfortable seating edge with 20% more sleeping area.
